

# FRIENDS OF HUE SMART SWITCHES

WITH A TOUCH OF GLASS™

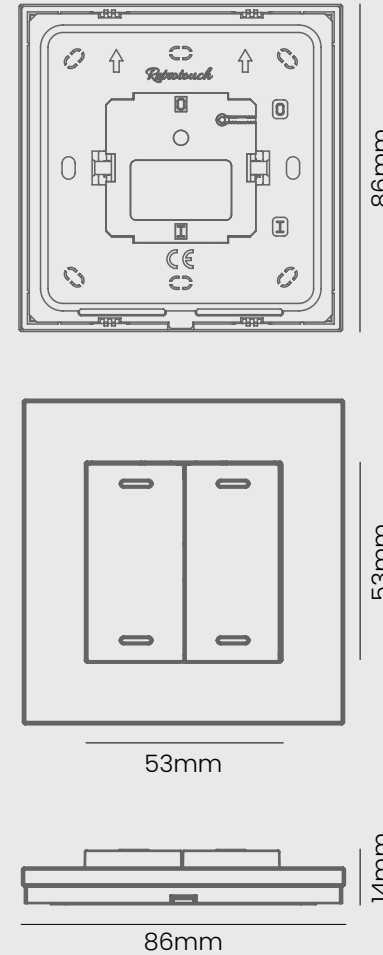

## SWITCHES FOR HUE.

Retrotouch, the innovative UK lighting solutions brand, has become an official supplier of Philips Hue light switches, providing consumers with beautifully-designed 'always on' system for effortless control over their Philips Hue lighting.

Addressing the issue of a home's wireless smart lighting connections being cut off from smart functions if a light switch is manually flipped off, the new Retrotouch switches ensure that the lighting circuit is always on. While the switches will work as normal to flip lights on and off, the lighting circuit will remain on so that Hue is always ready and working when you want it, seamlessly delivering smart App, HomeKit and motion functions.

### SPECIFICATIONS / FEATURES

Upgrade your system to constantly be ready to work with Hue, whilst still being able to flick the lights on and off when you enter and leave the room.
